-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1 and 2, the applicant fails to provide a structural environment in which the safety apparatus is used, i.e., for use or attachment to a roof of a building. Note Figure 1.

With respect to claim 2, line 1, it is unclear as to which flat plates the applicant has referred. Note that in claim 1, line 1, and claim 2, line 1, the applicant has recited "the flat plates."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Roby et al \$4,606,430, Glynn et al #5,143,717, or Krebs #6,668,509. Roby et al discloses a safety anchor 10 comprised of flat plates 12, 14, attached by hinge 15, with an eye 32 secured thereon for attachment to a

safety cable 33. Glynn et al disclose a safety anchor 10 comprised of flat plates 22, 24, attached by hinge 28, with an eye 70 secured thereon for attachment to a safety cable thereto. Krebs discloses a safety anchor 10 comprised of flat plates 12, attached by hinge 18, with an eye 24 secured thereon for attachment to a safety cable 28.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and rewritten to overcome the Section 112 ambiguity as advanced above. The primary reason for the allowable subject matter of claims 2 and 3 (method steps requiring) is the inclusion of additional flat plates with eyebolts and a walker cable extending therebetween, and a personnel cable in sliding engagement with the walker cable and to a worker harness. The prior art of record fails to teach or suggest the claimed feature absent the applicant's own disclosure.

Conclusion

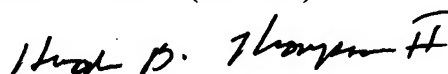

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lewis #3,022,855, Huggett #3,860,089, Weiner et al #4,633,974, Olsen et al #5,156,233, Riches et al #5,224,427, Rexroad et al #5,850,889, Gleave #5,878,534, Murray #6,053,281, Collavino #6,092,623, Weir #6,148,580, and Poldmaa #6,786,020 are cited to teach safety assemblies for workers.
